

FIDELITY CUSTODY MINIMUM · RESEARCH REPORT

The \$100M Line

What Fidelity's custody minimum means for 1,087 advisors, and how the next nine months play out.

\$100M HELD AT FIDELITY

BELOW THE LINE

1,087

registered investment advisers hold less than \$100M at Fidelity.

A letter, a deadline and 1,087 firms below the line

What happened, who it hits, and what comes next, on one page.

On October 1, 2026, Fidelity began telling advisory firms with less than \$100M on its platform that their custody will end on June 30, 2027. We read the public filings of every retail advisory firm under \$1B to see who is affected, where the money goes, and what the move takes.

1,087 Advisory firms below the \$100M line at Fidelity	\$40.5B Client assets those firms hold at Fidelity	393 Fidelity-only firms that must open a new custodian	~\$33–39B Estimated to leave Fidelity, across four scenarios ESTIMATED
--	--	--	--

- 1 Nearly half of Fidelity's small-firm users fall short.** 1,087 of the 2,286 firms in our study that use Fidelity hold less than \$100M there. That count is a floor.¹
- 2 Two kinds of firm face two different jobs.** 708 small firms keep almost everything at Fidelity. 379 larger firms keep only a small slice there.
- 3 393 firms have no second custodian.** They must open a new one from scratch. The other 694 can fold their Fidelity accounts into a custodian they already use.
- 4 Most of the money goes to Schwab.** An estimated \$33–39B leaves Fidelity in every scenario we tested, and ~\$24–27B of it lands at Schwab.
- 5 Paperwork is the real limit, and it lands in tax season.** We estimate ~376,000 documents (range 244,000–564,000). For a typical small firm, client signatures fall between March and May 2027.

WHERE TO READ

The letter	p3
Who is affected	p4–p6
Where the money goes	p7–p8
The paperwork wall	p9
The four paths	p10
What to do before June	p11

→ The story starts with the letter itself, and with how much of it is still unclear.

¹ Form ADV lists only custodians that hold 10% or more of a firm's separately managed assets, so some affected firms are not visible. Source: SEC Form ADV; FastTrackr analysis. Tiles 1–3 are observed counts; tile 4 is Estimated.

Fidelity set a firm date but left the edges open

The rule is simple. Several of the details that matter most are not.

Letters began reaching advisory firms around October 1, 2026, when the first reports appeared. Firms that custody with Fidelity must hold at least \$100M in client assets on the Fidelity platform. Otherwise the custody relationship ends after June 30, 2027. Trade press quoting the letter reports that "only assets held at Fidelity will be counted."² A firm's total assets under management do not help.

Fidelity called it a matter of consistency. It already asked new firms for \$100M. A spokesperson said it is "now extending that

criteria to existing custody clients."³ We found no Fidelity press release, FAQ or list of exceptions as of October 5.

That is unusual. Custodians have usually priced small firms out with fees rather than ended the relationship. Fidelity itself widened a small-firm platform fee in 2013. Raymond James raised its minimum for new firms in 2009 but kept existing ones.⁴

FIG. 3A

Nine months from the letter to the deadline

Dates as reported; 268 days from 2026-10-05 to 2027-06-30. Tax season shown as Feb–Apr 2027.

Source: Fidelity letter as reported in trade press; FastTrackr analysis

The calendar is tight. From October 5 there are 268 days left. The annual Form ADV update is due March 31 for most firms, in the middle of tax season.

SIDEBAR

What we know, and what we don't

QUESTION	STATUS
Custody ends below \$100M held at Fidelity	● Confirmed
Deadline is June 30, 2027	● Confirmed
Only assets at Fidelity count	○ Reported from the letter
Same rule already applied to new firms	● Confirmed
Number of firms affected	○ Not disclosed by Fidelity
Fee-to-stay option or exceptions	○ None reported
Firms that reach Fidelity through an introducing broker	⦿ Unclear
Assets pooled at a network level	⦿ Unclear

→ The two open questions at the bottom decide which escape routes are real. First, though, how many firms sit below the line?

² AdvisorHub, 2026-10-01, quoting the client letter. Financial Planning describes the test as client assets "with Fidelity".

³ Fidelity spokesperson, as quoted by Financial Planning and Financial Advisor Magazine, 2026-10-01.

⁴ InvestmentNews, 2013-10-09; PlanAdviser, 2009-10-29.

Nearly half of Fidelity's small-firm users are below the line

1,087 firms and \$40.5B, spread across almost every state.

We started with every registered adviser, about 33,000 firms. We kept those that serve individual clients, report a custodian and manage under \$1B. That left 16,332 firms. Of those, 2,286 use Fidelity, and 1,087 hold less than \$100M there. Together they keep \$40.5B at Fidelity.

Most firms are far from the line, but most of the money is close to it. 483 firms hold under \$25M at Fidelity, yet together they

hold less than a tenth of the dollars. At the other end, 192 firms sit within \$25M of the line and hold 42% of the money. For some of them, moving other assets in could clear the bar.

The problem is spread out. California has 132 affected firms, Texas 108, Florida 91, New York 68 and Massachusetts 53. No single city has more than 18. Few local markets will feel a wave. Nearly every state will feel something.

SIDEBAR

Why 1,087 is a floor

Form ADV lists a custodian only if it holds 10% or more of a firm's separately managed assets. A small Fidelity slice can be invisible, so the true count is likely higher.

Our headline covers firms under \$1B. A wider scan finds 40 larger firms also below the line, holding ~\$2.0B at Fidelity. With them, the total is 1,127 firms, \$42.4B and 395 Fidelity-only firms.⁵

→ Those 1,087 firms are not one group. The same rule creates two very different problems.

⁵ Full scan of 18,601 firms, including SEC-registered firms with \$1B or more (IAPD state feeds 2026-10-01 and 2026-10-02). Source: SEC Form ADV; FastTrackr analysis. An outside estimate of ~1,100 affected firms (Winthrop & Co., 2026-10-02) is close to ours.

The same rule creates two very different problems

For small firms it means a full move. For larger ones it means tidying up a side account.

The affected firms split almost evenly by dollars, but not by shape. 708 are small firms, under \$100M in total. They hold \$20.8B at Fidelity. The typical one keeps 99% of its custodied assets there and serves about 45 clients.

The other 379 are larger firms with a small Fidelity slice. They clear \$100M in total but not at Fidelity. They hold \$19.7B there, yet the typical firm keeps only 25% of its assets at Fidelity. It serves about 157 clients.

FIG. 5A

Small firms are all-in at Fidelity; larger firms are not

Small firms = under \$100M in total (n=708); larger firms = \$100M+ in total, under \$100M at Fidelity (n=379). Medians.

Source: SEC Form ADV; FastTrackr analysis

Two composite firms show what that gap means in practice.

COMPOSITE FIRM

Jordan

the \$50M solo planner

Jordan runs a one-person, state-registered practice. The firm manages about \$50M and keeps about \$48M of it at Fidelity, the firm's only custodian. Jordan serves 59 clients. There is nothing to consolidate. Every account must be opened somewhere new and moved. That means about 51 households, ~128 accounts and ~386 documents (Estimated; range 228–620). Jordan is built from the 75 Fidelity-only firms with \$40–60M under management. 67 of them are state-registered, and 56 have two or fewer employees.

Composite firm, built from Form ADV medians; not a real firm.

COMPOSITE FIRM

Riley

the larger firm with a small Fidelity slice

Riley is a five-person firm managing about \$212M. About \$49M (21%) sits at Fidelity, and about \$135M at Schwab. Only ~33 of Riley's ~168 clients have assets at Fidelity. Riley can fold those accounts into Schwab, where Riley already works. That is ~29 households, ~72 accounts and ~145 documents (Estimated; range 102–200). Riley is built from the 254 larger affected firms whose main other custodian is Schwab.

Composite firm, built from Form ADV medians; not a real firm.

→ Jordan (one person, ~\$48M at Fidelity) faces more than twice the paperwork of Riley (five people, ~\$49M at Fidelity). The next question is how many firms are in each position.

Most firms have an easy move; 393 face the hard one

A second custodian turns a forced move into a transfer between accounts.

A firm's starting point sets the size of the job. Firms that already use a second custodian can move their Fidelity accounts there. Fidelity-only firms have no other custodian holding 10% or more of their assets. They need a new custody agreement, new technology links and new paperwork for every client before any money moves.

694 firms already use a second custodian. 393 are Fidelity-only. Most of the Fidelity-only firms are small: 349 small firms

holding \$15.7B. Only 44 larger firms are Fidelity-only.⁶

For firms that have a backup, it is mostly Schwab. Schwab holds the most money for 480 of the 694. These are real relationships with real money in them. The typical larger firm in this group already holds \$135M at Schwab, more than twice its Fidelity balance.

FIG. 6A

Nearly two in three firms already have a second custodian

- 694 already use a second custodian

SIDEBAR

What Jordan weighs

Jordan, our composite \$50M solo planner, keeps ~\$48M at Fidelity and has no second custodian, so the firm must pick a new one. Price comes first. Schwab, Altruist and Interactive Brokers charge no custody fee; SEI's starts at 0.10%. None of the four has a published minimum that would shut out a \$50M firm, while BNY Pershing's \$100M minimum matches Fidelity's.

Interest matters too. Schwab and Altruist have said in public that they want these firms. Interactive Brokers said only that it has no size minimums. Then there is stability: Vanguard agreed to buy Altruist in August, the deal is still pending, and Vanguard has not committed to pricing after it closes.

FIG. 6B

For firms with a backup, it is mostly Schwab

Schwab is the largest other custodian for 69% of the 694 (226 small firms, 254 larger firms)

Largest other custodian by dollars, among the 694 firms that already use a second custodian.

Source: SEC Form ADV; FastTrackr analysis

→ Add up every firm's likely choice and a clear pattern appears in where the \$40.5B goes.

⁶ For the 44 larger Fidelity-only firms, a median 31% of assets under management is at Fidelity. The rest sits in places Schedule D does not list, so some may not need a brand-new custodian. Source: SEC Form ADV; FastTrackr analysis.

Most of the money ends up at Schwab

Schwab wins mainly by default, because so many firms already use it.

We modeled where each firm's Fidelity assets are likely to go. Firms with a second custodian move into it. Fidelity-only firms are split across five custodians, in line with where new small firms have gone since 2024. A small share joins a larger firm instead. All of these figures are Estimated.

In the base case, ~\$38.5B of the \$40.5B leaves Fidelity. Schwab receives ~\$25.9B directly, about two-thirds. Of that, ~\$15.5B comes from firms that already custody there. Altruist (Vanguard) is a clear second at ~\$4.3B. Interactive Brokers gets ~\$2.0B, SEI ~\$0.6B and Goldman Sachs Advisor Solutions under \$0.1B. About \$4.6B goes to other custodians firms already use, such as Raymond James, Axos, Pershing and LPL.

FIG. 7A (ESTIMATED)

About two-thirds of the money lands at Schwab

FROM: \$40.5B AT FIDELITY

TO (BASE CASE)

Estimated, base case. Flows of the \$40.5B now at Fidelity, by destination, in \$B. Altruist and Vanguard shown combined (deal pending).

Source: SEC Form ADV; FastTrackr estimates

We tested three other scenarios: more firms joining larger firms, an early Savvy route, and larger firms moving assets into Fidelity. In every case, ~\$33–39B leaves Fidelity, 81–95% of the total. Schwab receives ~\$24–27B.

FIG. 7B (ESTIMATED)

\$33–39B leaves Fidelity in every scenario

~\$33–39B leaves in all four

Estimated. Dollars leaving vs staying at Fidelity across four scenarios (n=1,087 firms; \$40.5B).

Source: SEC Form ADV; FastTrackr estimates

SIDEBAR

What could keep money at Fidelity

Three things could keep some of the money in place. Advisors who join a larger firm that uses Fidelity can keep their accounts there; in the base case that holds ~\$2.0B (Estimated).

Savvy's new platform runs on Fidelity's clearing. If Fidelity accepts that route and onboarding opens in time, ~\$1.6–2.4B could stay (Estimated). Neither condition is confirmed.

The biggest lever is the reverse move. 307 firms, nearly all of them larger firms, hold enough across their custodians to clear \$100M by consolidating into Fidelity. If some do, ~68 firms stay and ~\$10.5B moves into Fidelity (Estimated).⁷

→ Where the rest lands depends on which custodians are ready, and willing, to take these firms.

⁷ The ~\$10.5B assumes those firms move all their other assets. If they move only enough to clear \$100M, the inflow is about \$2.4B. Source: FastTrackr estimates; assumptions in the appendix.

The firms leaving Fidelity have places to go

Schwab is the largest. Altruist is growing fastest with new small firms.

The custodians that serve small firms best share two traits. They charge no custody fee, and they publish no minimum. Schwab, Altruist and Interactive Brokers fit both. Together they are the natural landing spots for small firms.

Schwab is used by two in three retail firms in our study. Its share of new small firms has held steady at about 65%. Altruist is smaller, but its share of new small firms more than doubled, from 9.5% to 22.1%. Interactive Brokers still reaches about one new small firm in eleven, but its share is falling. Fidelity was already losing ground with new small firms before the letter.

CUSTODIAN	RETAIL FIRMS USING IT	NEW SMALL FIRMS, ≤2021 → 2024–26	PUBLISHED MINIMUM	COURTING SMALL FIRMS ON RECORD
Schwab	67%	66% → 65%	None	Yes, explicit
Fidelity	14%	8.5% → 6.2%	\$100M at Fidelity	n/a
Altruist (Vanguard) ⁸	8%	9.5% → 22.1%	None	Yes, explicit
Interactive Brokers	8%	13.9% → 9.3%	None	Factual only
SEI	2%	2.3% → 1.5%	None found	None found
Goldman Sachs Advisor Solutions	under 1%	~1.1% → 0.3%	Not disclosed	None found
Betterment (not modeled)	1%	1.9% → 1.9%	None	Factual only

FIG. 8B

Altruist more than doubled its share of new small firms

Share of new small firms (under \$100M) listing each custodian, by registration cohort: ≤2021 (n=6,472) vs 2024–26 (n=1,445).

Source: SEC Form ADV; FastTrackr analysis

On October 1, Schwab's head of advisor services called small firms "the backbone of the independent advisory profession."⁹ Altruist's chief executive said the firm could serve advisors leaving Fidelity. No custodian had published a Fidelity-specific offer, such as fee waivers, by October 5.

→ Picking a custodian is the easy part. Moving the clients is where the time goes.

⁸ Altruist alone; Vanguard's purchase of Altruist is pending. Betterment is shown but not modeled, because it reprices on January 1, 2027 and has made no recruiting statement. Retail firms using it: share of 16,332 firms in the study. New small firms: firms under \$100M, by registration year (n = 6,472 and 1,445). Source: SEC Form ADV; FastTrackr analysis; custodian pricing pages.

⁹ Schwab's head of advisor services, to Financial Planning, 2026-10-01. Altruist chief executive's LinkedIn post, 2026-10-01, as reported by WealthManagement.com.

The real bottleneck is paperwork, and it lands in tax season

Assets move in days. The forms before the transfer take months.

Every move needs two sets of papers. One is the custodian's account paperwork. The other is the advisory firm's own client documents. What changes from move to move is how much custodian paperwork is needed. Opening a new custodian is the heaviest: about three forms per account, plus a firm agreement.

Across all 1,087 firms, we estimate ~58,000 households, ~146,000 accounts and ~376,000 documents (range 244,000–564,000). That means ~151,000 client conversations. The load is lopsided. Small Fidelity-only firms are about a third of affected firms but carry ~48% of the documents. They are also the firms least likely to have operations staff.

FIG. 9A

Opening a new custodian means the most forms per account

Estimated, base case. Typical documents per account by type of move; joiners also sign firm documents per household.

FIG. 9B (ESTIMATED)

~376k documents need to move by June

Estimated, base case; range 244k–564k. Counts clients behind the Fidelity share only (all-client upper bound ~768k).

Source: SEC Form ADV; FastTrackr estimates

COMPOSITE FIRM

Jordan's nine months

Jordan is our composite \$50M solo planner: ~\$48M at Fidelity, no second custodian, 59 clients in ~51 households. Working back from June 30, signatures must close by mid-May: about five households a week from early March. Before that, Jordan picks a custodian by late November, signs up by mid-December and prepares forms in February. That is ~386 documents and ~154 client conversations (Estimated), on top of tax season and the March 31 Form ADV update, with no staff. A January decision removes most of the slack.

Composite firm, built from Form ADV medians; not a real firm.

FIG. 9C (ESTIMATED)

Jordan's signatures land in tax season

Jordan: composite \$50M solo planner, ~\$48M at Fidelity, no second custodian, ~51 households. Estimated, base case: ~128 accounts, ~386 documents.

Source: SEC Form ADV; FastTrackr estimates

Where FastTrackr helps: FastTrackr covers the shaded span in Fig. 9c: it collects household and account data once, prepares every custodian and firm form in bulk, sends them for e-signature and carries each account through to transfer initiation.

→ Paperwork volume depends on the path a firm takes. There are four.

Four paths, side by side

Each path trades paperwork against independence and certainty.

Every affected firm has the same four options. Which one fits depends on whether the firm already has a second custodian and how much it values its independence.

PATH	BEST FIT	FIRMS IT FITS	PAPERWORK	KEEPS FIDELITY?	MAIN RISK
Consolidate into a custodian already in use	Firms with a second custodian	694	~2 forms per account	No. But 307 could move other assets into Fidelity and stay.	Clients asked to move for a reason that is not theirs
Open a new custodian	Fidelity-only firms	393	~3 forms per account, plus a firm agreement	No	Longest setup; signatures in tax season
Join a larger firm	Owners ready to give up their own registration	Any. ~12% of Fidelity- only firms in our base case (Estimated)	~1 form per account, plus 4 firm documents per household	Yes, if the host uses Fidelity	Loss of independence. Few hosts take books under \$100M.
Wait for an alternative (Savvy)	Firms willing to bet on an unconfirmed route	Unknown	Treated like a new custodian	Possibly, on Fidelity clearing	Fidelity has not confirmed it. Onboarding opens early-to- mid 2027.

Joining a larger firm is the only sure way to keep Fidelity custody. But it does not avoid paperwork. It swaps custodian forms for a full set of new client agreements. Few hosts publish an entry point for small firms. Savvy's advisor recruiting cites a \$25M book.¹⁰

Waiting is the riskiest choice. Savvy launched its platform on September 23, cleared and custodied at Fidelity. Outside firms

can only join a waitlist, and pricing is not final.¹¹

For Jordan (the \$50M solo planner with ~\$48M at Fidelity and no second custodian), consolidating is not an option. Every remaining path means a heavy load. The lightest, joining a host that keeps Fidelity, still means ~333 documents (Estimated).

FIG. 10B (ESTIMATED)

Every path open to Jordan means 330 or more documents

Jordan: composite \$50M solo planner, ~\$48M at Fidelity, no second custodian, 59 clients (~51 households). Base case with low-high range.

Source: SEC Form ADV; FastTrackr estimates

Where FastTrackr helps: whichever path a firm takes, FastTrackr handles the repapering across custodians and firms, for every account in bulk.

→ **Whichever path a firm picks, the calendar is the same. The next page sets out what to do, and when.**

¹⁰ Savvy recruiting posting. Older figures for other hosts start around \$20–25M and are not current: Integrated Advisors Network \$25M (2014) and Carson Partners \$20M figures are dated and unverified. Join rate: assumption range 5–20% across scenarios.

¹¹ Savvy Wealth release via Business Wire, 2026-09-23; AdvisorHub, 2026-09-23.

What to do between now and June

A firm that decides by late November can finish signatures by mid-May.

These steps are vendor-neutral. The dates are working targets for a small firm, not rules. Only June 30, 2027 comes from Fidelity.

FIG. 11A

Three phases between now and June 30

1 Decide Oct–Nov	2 Prepare Dec–Feb	3 Sign and move Mar–Jun
OCT 31, 2026 Confirm the number held at Fidelity, not total assets under management. OCT 31, 2026 List every household, account and account type, with beneficiaries, bank links and standing instructions. NOV 15, 2026 Ask Fidelity, in writing, how offboarding works and whether any network or broker route changes the picture. NOV 30, 2026 Choose a path. Compare fees, minimums, technology links and written transition support.	DEC 15, 2026 Sign the custody agreement and connect CRM, billing, trading and reporting. JAN 15, 2027 Update Form ADV Part 2A, the advisory agreement and Form CRS where needed. FEB 1, 2027 Tell clients early, in a short letter. Order households from simplest to most complex.	MAR 1, 2027 Prepare every form before the first meeting, to cut rejected paperwork. MAY 15, 2027 Finish signatures. Use e-signature where the custodian accepts it. JUN 15, 2027 Transfer in waves, fix rejects, and confirm cost basis and standing instructions.

Suggested sequence for an affected firm; dates are targets, not rules.

FAQ · Questions advisors ask

Does total assets under management count toward \$100M?

No. The letter, as reported, counts only assets held at Fidelity.

Can a firm near the line move assets in and stay?

Yes, if it has assets elsewhere. 307 affected firms would clear \$100M if they moved their other custodied assets to Fidelity.

Can a firm stay through Savvy?

Not yet known. Fidelity has not said whether its test applies to firms that reach it through an introducing broker.

What happens after June 30, 2027?

Fidelity says the custody relationship ends. It has not published offboarding details, so firms should ask in writing.

Where FastTrackr helps: FastTrackr shortens the Prepare and Sign phases. Data is collected once, every form for every account is prepared in bulk, and packages go out for e-signature together. A firm can move through repapering in days, not months.

→ For Jordan, a one-person firm with ~51 households and ~\$48M at Fidelity, every one of these steps lands on the same desk. That is where outside help comes in.

Planning a move? Tell us.

Advisors facing the deadline can share a few details and get help with the paperwork.

A firm like Jordan's (a \$50M solo practice, ~\$48M at Fidelity, no second custodian) faces ~386 documents (Estimated) and a deadline that runs through tax season. Advisors planning a move can share four things with us:

1	2	3	4
current custodian	likely destination or path	rough number of accounts	target completion date

How FastTrackr helps, whichever way a firm moves. An advisor may stay at Fidelity by joining another firm, join a firm that custodies elsewhere, or move existing accounts to a new custodian. In every case FastTrackr does the repapering: all the custodian paperwork and all the firm paperwork, across custodians and firms, for every account in bulk.

WHAT HAPPENS NEXT

01

Share the four details.

FastTrackr maps which custodian and firm forms each account needs for that move.

02

Collect the data once.

Household and account data comes in from CRM exports, spreadsheets or statements, with a view of only what is still missing.

03

Get signature-ready paperwork.

Validated packages go to DocuSign in one step, or as filled PDFs for wet signatures.

contact@fasttrackr.ai

Subject: Fidelity \$100M – planning a move

Disclosure: FastTrackr provides transition and re-papering software to advisers and may benefit from the transitions described in this report.

METHODS NOTE

How we did this

Counts come from our own analysis of public SEC Form ADV data: the SEC roster of September 1, 2026 and the state feed of October 1, 2026. The study covers 16,332 retail firms under \$1B that report a custodian. "Affected" means a firm lists Fidelity in Schedule D, Item 5.K(3), with less than \$100M there. Small firms (Segment A) manage under \$100M in total. Larger firms (Segment B) manage \$100M or more. Fidelity-only means no other custodian at 10% or more.

Observed counts are exact. Flows and workload are modeled and marked Estimated. They rest on stated assumptions about joining rates, households and forms per account. Third-party estimates appear only as cross-checks. Jordan and Riley are composites built from Form ADV medians. Full methods, assumptions, limits and sources are in the separate appendix.
